Research Papers

Physiological and molecular basis of water-deficit stress tolerance in F₁ hybrids and their parental lines in rice
Sasmita Pattnaik, Vinod Kumar, Kapil K. Tiwari, Chandra Prakash, Ashutosh Singh, Ashok K. Singh, Niranjan Behera, Jogeswar Panigrahi, S. V. Amitha Mithra and Trilochan Mohapatra ... 127

Genetic improvement trend analysis for end-use quality characteristics among wheat cultivars of North-Western India
Soma Gupta, Rajbir Yadav, Kiran Gaikwad, Ashutosh Kushwah, Anju M. Singh and Naresh Kumar Bainsla ... 137

Exploring phenotypic expression to augment quality of *Triticum aestivum* and improve selection efficiency
D. Mohan and R. K. Gupta ... 144

Cloning and characterization of nutrient deficiency and salinity stress responsive *TaCBL4* gene from bread wheat (*Triticum aestivum* L.)
S. Lekshmy, S. K. Jha, V. Chinnusamy and R. K. Sairam ... 152

Genome-wide identification and characterization of Xylanase Inhibitor Protein (XIP) genes in cereals
Humira Sonah, Shaila Chavan, Jawaharlal Katara, Juhi Chaudhary, Suhas Kadam, Gunvant Patil and Rupesh Deshmukh ... 159

Quantitative trait loci for mature embryo culturability traits from Yuanjiang common wild rice (*Oryza rufipogon* Griff.)
Kun Zhang, Zheng Yin, Xu Xu, Chao Pu, Qi Li, Di Wu, Chuanqing Sun and Yongcai Fu ... 167

Performance evaluation of neural network, support vector machine and random forest for prediction of donor splice sites in rice
Prabina Kumar Meher, Tanmaya Kumar Sahu and A. R. Rao ... 173
Genetic association and frequency distribution in segregating generations derived from pigeonpea crosses
B. C. Ajay, M. Byregowda, G. N. Veerakumar, K. N. Ganapathy, Murlidhar Meena, H. Prashanth Babu and M. Reena
... 181

Molecular analysis of genetic diversity among different groups of potato (Solanum tuberosum L.)
Raj Kumar and J. S. Torres
... 187

Validation of reference genes in pansy for accurate transcript normalization during its flowering stages
Yuan Zeng, Jing Li, Sheng Gong, Ke Zhang, Haiyan Sun, Guopeng Zhu, Xiqiang Song and Jian Wang
... 195

Short Communications

AMMI, GGE biplots and regression analysis to comprehend the G x E interaction in multi-environment barley trials
Vishnu Kumar, A. S. Kharub, R. P. S. Verma and Ajay Verma
... 202

Resistance to powdery mildew (Blumeria graminis f. sp. tritici E. Marchal.) in bread wheat, durum, dicoccum and triticale genotypes
Daisy Basandrai, Ashwani K. Basandrai, S. K. Rana, B. K. Sharma, Amar Singh, Dhirender Singh and P. D. Tyagi
... 205

Physiological traits in relation to yield improvement in chickpea (Cicer arietinum L.) under depleting soil moisture environment
Summy, K. S. Boora and K. D. Sharma
... 209

Root acidification, a rapid method of screening soybean genotypes for low-phosphorus stress
Krishnapriya Vengavasi and Renu Pandey
... 213

Participatory varietal selection in fodder oats under temperate conditions of Kashmir valley
Uzma Mehraj, Mushtaq Ahmad, Ishfaq Abidi, Gul-Zaflar and Asif B. Shikari
... 217

Multivariate analysis of ginger (Zingiber officinale Rosc.) germplasm of North Eastern India
A. Kumar, C. Kapoor, H. Rahman, R. Karuppaiyan, S. Rai and R. Denzogpa
... 221

Flower pattern formation of orchids: Case studies with respect to ABCDE model
Mridul Chakraborti, Ram Pal, N. Sailo, Raj Kumar, D. Barman and D. R. Singh
... 224

Notification of crop varieties and registration of germplasm
... 228
